GLADIOLUS BULBS

SEASON 1925-1926

LEGRON FLORAL CO.
R 4, GLENDALE AVENUE
TOLEDO, OHIO
TENOST LUST BBULBS OR PRICE FOR TEN

THIS list of gladiolus bulbs has been prepared principally for the amateur or the old grower who wishes to purchase one or two bulbs of a kind for a test plot.

We sell at wholesale to any one whether you are a commercial grower or not providing you take in quantities as listed in wholesale price list.

In this retail list we give after the name of each bulb the name of the originator. The descriptions given are mostly taken from the originator's catalogue, especially Diener's and Kunderd's varieties.

SIZE AND QUANTITIES. All bulbs sent out will be one and one-fourth inches up in diameter. Six will be sold at dozen rate. Bulblets are only sold in packages as listed as these are put up at time of cleaning.

PREPAID POSTAGE. We pay postage anywhere in United States, Canada, or Australia.

R. F. D. customers should not ask for shipment during zero weather. Post Office will not insure against freezing. We take all risk if you let us start them out from here when we have weather around 20 degrees above zero, which we generally have at some time during every month of the winter season.

TERMS. We can not afford to fill orders of less than $1.00. Please send cash with order from $1.00 to $5.00. On $5.00 and over we will accept 25 per cent deposit and balance when you are ready for the bulbs.

POSTAGE STAMPS. We can only use 1c and 2c stamps and then only for the fractional part of a dollar. It is just as safe to put a dollar bill in the mail as postage stamps. Either money or stamps are sent at customer's risk. Drafts, checks, and money orders are at our risk and are perfectly safe.

SECOND CHOICE. As the season advances certain varieties are sold out. To the amateur we would suggest that they make a list of second choice or allow us to do so as we can always please you. To the old grower we dare not substitute as we might give him something he already has.

AMERICAN GLADIOLUS SOCIETY. This society now has a membership of around 2,500 from all over the world. The society gets out a monthly Bulletin devoted exclusively to Gladioli growing. You have the privilege of asking any question you wish through its columns and it will be answered. The Bulletin one year and membership costs $2.00. Send money to John C. Davis, Secretary, 77 South Avenue, Rochester, N. Y.

CULTURE. The culture of gladioli is quite simple. Ordinary fertile soil is all that is required. Sandy soil is best and clay is poorest. Cultivation and water are the main helps in growing good glads.

TIME OF PLANTING. Plant in spring as soon as frost is out of ground. The large bulbs will come in bloom first and the smaller sizes later, so the bloom of a single variety extends over quite a period.
TWELVE BULBS FOR PRICE OF TEN

Then we have the early and late varieties which also prolong the blooming period. We also plant some bulbs about every two weeks up to July first and in this way have blooms to sell from July first until killed by frost.

SIZES. No. 1 is 1½ inch up; No. 2, 1¾ inch to 1½ inch; No. 3, 1 inch to 1¼ inch; No. 4, ¾ inch to 1 inch; No. 5, ½ inch to ¾ inch; No. 6, ¼ inch and less. Bulblets are the small bulbs that form around the base of the larger bulbs. These always come true to name with the parent bulb.

PLANTING. We dig trenches six inches wide for all sizes. Nos. 1, 2 and 3 are planted four to six inches deep, putting two rows in a trench in zig-zag shape. These are placed by hand with right side of bulb placed up. Nos. 4, 5 and 6 we sow in trenches about 2 to 3 inches deep regardless of position of bulbs. Bulblets are planted one inch deep and bottom of trench is covered with bulblets so that they entirely cover same.

The deep planting of large bulbs keeps wind from blowing them over after spikes have formed and also helps to hold moisture in dry seasons.

For field culture with the horse we have our rows 30 inches apart. This allows cultivator to cultivate the entire space by going once through. The rows must be straight. We always use lines in digging trenches.

CUTTING FLOWERS. Always cut flowers in morning when spikes are full of moisture. Spikes should be cut as soon as one or two flowers are open. Fill your vase with fresh water each day and cut one inch off the stems and you will have a nice bouquet for a week. The bottom flowers should be pulled off as they wilt. Always leave at least four leaves on plant in cutting. The main growth of the bulb and production of bulblets is after the spike is cut. Cultivation should not be neglected at this time.

DIGGING. We dig bulblets about September 1. They can be dug when still quite green. We cut the tops off close to the ground with a sickle and then use a long handle round pointed shovel and shovel dirt and all into a sieve. The dirt is then rubbed or shook through the sieve. The large bulbs are first loosened with a potato fork and then pulled up by hand and the tops broken off next to the bulb and the bulb and roots thrown into a tray six inches deep. Trays are then taken to cellar but windows are left open to give plenty of air.

STORAGE. After about two to three weeks from digging the roots and bulblets can be taken from the bulbs easily. After the bulbs are cleaned they can be put back in the trays but not over FOUR INCHES deep. Never store bulbs in same basement room with a furnace fire. If you have only up to a dozen bulbs of a kind you can use a 5-pound sugar sack nicely. Leave the top open. Temperature for winter should be between 35 and 40 degrees.

VISITORS. To reach our place take South Street car line and get off at State Hospital gate. Our greenhouse is one quarter mile south and about two city blocks west. Not open Sundays.
